

Questionnaire on postoperative pain

BioQ Pharma has developed this questionnaire to help you with your questions about post-operative pain management.

It can serve as a guide during your appointment with your doctors.

Doctor, how will you treat the pain after my surgery?

Are there any risks coming with the proposed treatment and may I ask you what these are?

Is there any good alternative pain treatment not having these risks?

Is there a risk for my baby when breastfeeding? (only applicable for C-section)
